

OXIDANT AND ANTIOXIDANT IN BIOLOGY

Cell signaling and Nutrient-Gene Interactions

OCC World Congress 2012 in Alba, Italy, June 20-23

SCIENTIFIC SESSIONS

**Nrf2-Driven Regulation of Antioxidant Defense
Lipid Oxidation and Signaling
Nutrient-Gene Interactions and Epigenetics
Novel Roles of Micronutrients
Epigenetics, Metabolism and Aging**

The Oxygen Club of California seeks to promote scientific interactions to improve the understanding of the roles of micronutrients in oxygen biology and medicine as they pertain to redox and energy metabolism, cell signaling, nutrient-gene interactions, transcription, and epigenetics. An ultimate goal is to translate this findings to benefit human life and health-span.

This conference, organized with the University of Turin, is co-sponsored by the Linus Pauling Institute.

MEETING VENUE: TEATRO SOCIALE ALBA (CN) ITALY
